Faculty of Dental Sciences

University of Peradeniya

1. UNIVERSITY OF PERADENIYA – AN OVERVIEW

University of Peradeniya (UoP) is the largest University in Sri Lanka in terms of student intake, infrastructure facilities, trained academic staff, number of faculties and institutes etc. At present, UoP has nine faculties, namely the Faculties of Agriculture, Allied Health Sciences, Arts, Dental Sciences, Engineering, Medicine, Science, Management Studies and Veterinary Medicine & Animal Sciences, with 83 departments covering a wide range of study areas. The academic programmes of these nine faculties are strengthened by the well-resourced main library, faculty libraries, research laboratories and the IT centre which cater to the whole university.

The vision of the UoP is to provide a uniquely transformative experience for its students, staff and partners, whilst serving the public through producing and implementing innovative research and outreach programmes that are anchored in its founding values and principles. Its mission is to contribute to national, regional and global society through the pursuit of education, learning and research, and the dissemination of knowledge at the highest international levels of excellence. By offering 62 degree programmes with its well qualified and well experienced academic and support staff, UoP has been successful in accomplishing its mission. There are 55 senior professors and 210 professors, 5 associate professors, 367 senior lecturers and 207 lecturers in different fields of studies in the UoP at present.

The academic life of students entering the university is further enriched by the well-developed recreational facilities provided free of charge. Further, UoP is the largest residential university in Sri Lanka and the students entering the UoP enjoy the privilege of in-campus accommodation. However, maintaining standards of the academic programmes have become a great challenge to all state universities with the increased student intake and limited financial allocations. Therefore, the UoP and individual faculties strive hard to obtain additional funds from external agencies to maintain the quality and the standards of its function and resources.

2. FACULTY OF DENTAL SCIENCES

Dental Education in Sri Lanka commenced with the establishment of the 'Dental School' in 1944, which was then affiliated to the Faculty of Medicine of the University of Ceylon in Colombo. The pre-clinical and para-clinical studies were conducted in the Faculty of Medicine and the clinical studies were carried out by two Departments in the Dental School; Department of Dental Surgery and Department of Prosthetic Dentistry. The annual intake of students in 1950 was 10 in number.

The Dental School was shifted to Augusta Hill, Peradeniya in 1953. However, the pre-clinical and para-clinical studies continued to be held in Colombo. Dr. S.B. Dissanayake was appointed as the Chairman of the Dental School. In 1967, Dental school formally came under the Faculty of Medicine, UoP under the first Dean of Medicine, late Prof. Senaka Bibile. Revision of departmental structures in 1969 created seven divisions of study under the Head of the Dental School and it was considered as one Department in the Faculty of Medicine. At the Peradeniya Campus, the Medical, Dental and Veterinary Schools were amalgamated to form one common Faculty of Medical, Dental and Veterinary Sciences in 1973. By this time, the annual intake of dental students had risen to 50.

A scheme of departmentalization of the Dental School was implemented in 1981, creating five Departments of study. Finally, in 1986 the Dental School obtained an independent faculty status, The Faculty of Dental Sciences, University of Peradeniya under the first Dean, Prof. K. Bambaradeniya.

With Japanese International Corporation Agency (JICA) Grant Aid in 1998, the Faculty of Dental Sciences was commissioned in a new Dental (Teaching) Hospital premises with modern equipment, state of the art facilities in its current location, next to Peradeniya (Teaching) Hospital. The faculty now has modern infrastructure, qualified manpower for training dental undergraduates who can serve all parts of the world. Some of the key facilities include clinics and laboratories for advanced dental treatment, wards, operating theatre and an intensive care unit.

Currently, the Faculty of Dental Sciences, UoP consists of eight Departments: Basic Sciences, Community Dental Health, Restorative Dentistry, Oral Medicine and Periodontology, Oral Pathology, Oral and Maxillofacial Surgery, Comprehensive oral health care and Prosthetic Dentistry. Within these Departments, there are 14 Divisions of study; General Anatomy, Dental Anatomy, Physiology, Biochemistry, Oral Medicine and Radiology, Periodontology, Pharmacology, Microbiology, Oral and Maxillofacial Surgery, Oral Pathology, General Pathology, Paedodontics, Orthodontics and Community Dental Health.

14. CODE OF CONDUCT FOR DENTAL STUDENTS

A dental student is a unique undergraduate in the entire university system for the reason that they treat patients whilst being an undergraduate. Therefore, a dental student would need to be well prepared to be committed towards their training and be ready to take due responsibilities towards the society and general public prior to the beginning of their professional career as a dental surgeon. The investments made by the 'tax-payer' of this country on your entire education cannot be forgotten or underestimated for your entire life. Moreover the patients that you will receive training on further help you learn on them by consenting to be treated by an apprentice. Therefore, a dental student is very much obligated to serve back to the society as they take up to dental practice. A dental student should also constantly recall that you become the 'most expensive graduate' among other graduates produced in Sri Lankan universities; since the highest amount of public money is being spent on the training of a dental undergraduate. The following aspects are of paramount importance during your training as an undergraduate.

i). Attitude: A Dental Student should not only focus on knowledge and skills related to the practice of Dentistry but are expected to cultivate positive attitudes suited for a dental professional.

ii). Relationship with teachers, other students, health care team members and patients: The interaction and communication with your teachers, other students and staff will be of paramount importance during your early student days. As you move up to your clinical part in training, it will be essential that you develop honest and considerate relationships with patients, and other members in the health care team for the common target of delivery of health care to the society while appreciating the opportunity for skills-training carried out on patients. As equal to all health care professionals, you would need to extend unreserved respect and care for patients regardless of their social status, attitudes or racial/religious/cultural differences.

iii). Continuous Professional Development (CPD): CPD is an essential element in the growth and maturity of your professional career. It also is an ethical obligation for all health care professionals.

Although you start the professional career as a dental student, later as a dental practitioner you will need to embark on life-long learning and academic updating as you take up to clinical practice.

iv). Responsibilities towards the society: As stipulated in the Sri Lanka Medical Council, an ethical behavior is mandatory for a doctor or a dental surgeon. Therefore, the students are expected to be well-informed of ethical behavior by referring to the details provided therein. When conducting research, they should always be in accordance with the ethical guidelines laid down in the Faculty of Dental Sciences or the relevant institutions where the research is to be conducted. At the same time, you as a responsible adult in society should share the responsibility to report on unethical or unlawful events in a professional manner.

v). Rules and Regulations applicable to the University and the Society:

A dental student or a dental surgeon is no exception in terms of general rules and the law applicable for the citizens in the country. Students are expected to go through the 'Rules of the Faculty' and 'Rules of the University' on the web sites.

vi). Attire and Self-Care: All students are expected to abide by the Faculty Dress Code. A dental student should dress appropriately to fulfill the high expectations of the society. The dress you wear should give you confidence and a professional appearance. Therefore, follow the basic rules of being simple and modest while maintaining personal hygiene to the highest level. Please note shorts, short/tight-fitting garments, denims, T-shirts, slippers & running shoes are not allowed in the faculty. All clinical students must abide by the standard clinical attire prescribed by the faculty.

vii). Alcohol and smoking: Alcohol and smoking are prohibited in Health Care Institutions and the Faculty.
